

Meet Friends of Austin

We are inspired by our friends, Mark and Hannah Corman, whose son Austin was born with a fatal form of congenital muscular dystrophy called L-CMD, primarily affecting the muscles & heart. Kids with an L-CMD diagnosis statistically die in their teens. There are currently no treatments and no cure. Austin's family has started the non-profit L-CMD Research Foundation to urgently raise funds to develop a gene therapy treatment with a major academic research institution. The goal? \$2 million.

L-CMD Research Foundation has created a fundraising campaign, "2 Before 2!" which aims to raise \$2 million before Austin's 2nd birthday on August 27th. Friends of Austin presents the 2 Before 2! Golf Outing, benefiting the L-CMD Research Foundation, to help reach this important goal.

Friends of Austin is a project of The Foundation For Enhancing Communities (TFEC), fiscal sponsor. The official registration and financial information of The Foundation for Enhancing Communities may be obtained from the Pennsylvania Department of State by calling toll free, within Pennsylvania, 1.800.732.0999. Registration does not imply endorsement.

FISCAL
SPONSOR

LCMD Research Foundation

- Many children with L-CMD do not achieve sitting, crawling, walking; and those that do will lose those abilities.
- There are about 200 kids in the world with L-CMD
- L-CMD not only affects the skeletal muscles but also the heart; many children end up with implanted heart monitors
- Most cases of L-CMD are not inherited but are a result of a randomly-occurring DNA mutation
- There are currently no treatments and no cure.

Inspired by Austin, the purpose of the foundation is to fund the work of researchers and scientists who will develop treatments and a cure for L-CMD as soon as possible. Visit www.lcmdresearch.org to learn more.
